HCL TECHNOLOGIES | CONSULTANT

Feb 2014 – Sept 2015 | Noida, UP

PERSONAL PROJECTS

QMONEY | GITHUB LINK

QMoney is a visual stock portfolio analyzer. It helps portfolio managers make trade recommendations for their clients.

- Defined the core logic of the portfolio manager and published it as a library.
- Refactored code to add support for multiple stock quote services.
- Improved application stability and performance.

XMEME | GITHUB LINK

XMeme is a simple backend web application where users can post and see memes.

- Developed XMeme by writing necessary GET and POST APIs for fetching and posting the memes.
- Built the backend application from scratch using a Spring starter template and stored/retrieved the data from MongoDB.
- Tested the application functionality.

OBJECT MODELLING | GITHUB LINK

- Conceived a Hackerrank like contest application by applying Core Java + design skills
- Designed & implemented the classes and business logic required to simulate a contest framework.
- Authored a **JukeBox** application based on a problem statement, from scratch.

AWARDS

- Participated & presented in Life Science AI Hackathon held world over
- 5-Star rating from customers in quality work deliverables
- Product of the year recognized for two consecutive years 2016-17 & 2017-18
