• 5-Star rating from customers in quality work deliverables
• Product of the year recognized for two consecutive years 2016-17 & 2017-18 across LOBs

EXPERIENCE

SAP LABS INDIA PVT LTD | Senior Software Engineer
Sept 2015 – Present | Gurugram, HR
Production & Revenue Accounting

• Led a cross-functional team in developing innovative solution that reduced redundancy, and optimized workflow efficiency, resulting in a improvement in 30% overall operational performance.
• Monitored and assessed the progress of trainees, providing personalized guidance and feedback to accelerate their learning curves.
• Successfully executed a strategic data purging process, resulting in a substantial reduction in database size by 70%, enhancing system performance, and contributing to more efficient data management.
• Implemented preventive measures to minimize the occurrence of recurring issues, contributing to a significant 10% reduction in overall downtime.
• Facilitated dynamic post-feedback discussions, integrating valuable customer insights to drive iterative improvements throughout the co-development process; resulting in a final product that exceeded user expectations and increased customer satisfaction by 25%.
• Received recognition for playing a key role in the successful incorporation of innovative features, contributing to a 30% increase in user engagement and overall product competitiveness in the market.

PROJECTS

QMONEY | Github Link
QMoney is a visual stock portfolio analyzer. It helps portfolio managers make trade recommendations for their clients.
• Defined the core logic of the portfolio manager and published it as a library.
• Improved application stability and performance.

XMEME | Github Link
XMeme is a simple backend web application where users can post and see memes.
• Developed XMeme by writing necessary GET and POST APIs for fetching and posting the memes.
• Built & tested the backend application from scratch using a Spring starter template and stored/retrieved the data from MongoDB.

OBJECT MODELLING | Github Link
• Conceived a Hackerrank like contest application by applying Core Java + design skills
• Designed & implemented the classes and business logic required to simulate a contest framework.
• Authored a **JukeBox** application based on a problem statement, from scratch.
